

The New A 45 AMG 4MATIC Edition 1

- **Exclusive aerodynamic parts and decal highlight the motorsports spirit of the exterior**
- **AMG performance seats emphasize the sporty and exclusive interior**

Mercedes-Benz Japan Co., Ltd. (President: Kintaro Ueno; Head office: Minato-ku, Tokyo) launches a new special limited edition to commemorate the market launch of the new A 45 AMG 4MATIC, the high-performance version of the new generation sports compact car, A-Class. Featuring special exterior and interior designs, the “A 45 AMG 4MATIC Edition 1” underlines the distinctive individuality of the AMG A-Class even further. Beginning today, a total of 600 orders can be placed for the new special edition through the nationwide network of authorized Mercedes-Benz dealerships.

The new special edition is based on the A 45 AMG 4MATIC, a paragon of sports compact cars powered by the new AMG 2.0-liter four-cylinder inline turbo engine with direct injection that has been developed by Mercedes-AMG. The exterior design of the Edition 1 highlight the motorsports spirit with features such as special aerodynamic parts (flics and rear spoiler), special decals for AMG sports stripes on the engine hood, roof, sides, and rear end, and AMG 19-inch light alloy wheels in multi-spoke design, painted in matt black. In addition, the front spoiler lip, side skirts, and rear diffuser are finished in high-gloss black, while the radiator grille, exterior mirrors, rear spoiler, and brake calipers sport red accents, presenting a sharp contrast with the black elements and making the car look even more aggressive.

The AMG performance seats that ensure excellent lateral support in corners, and the AMG performance steering wheel with Alcantara®-covered grips encourage the driver to drive more dynamically. The AMG E-SELECT lever sporting embossed AMG Affalterbach emblem and special “Edition 1” badges create the special ambience.

Despite having these attractive features, the new A 45 AMG 4MATIC Edition 1 is priced 7.10 million yen, just 0.7 million yen higher than the basic model.
